KEY PROJECTS

Leading full-stack delivery at Spell Link Pvt Ltd — TravelTourUp, CarHub, and estimation CRM.

TravelTourUp (<https://www.traveltourup.com>)

Feb 2026 - Present

Travel Booking Platform (Flights, Hotels & Cars)

Founder & Lead Full Stack Developer · Spell Link Pvt Ltd

Full-featured travel booking platform where users book flights, hotels, and rental cars from one interface. API-driven architecture focused on performance, reliability, and a smooth end-to-end experience from search to confirmation.

Next.js Supabase (Auth & Database) Resend Duffel (Flights & Hotels) CarTrawler (Car Rentals)

- > Designed overall system architecture and led delivery from planning through production deployment
- > Integrated third-party travel APIs for flights, hotels, and car rentals with resilient error handling
- > Built frontend and backend features end-to-end, including auth, booking flows, and transactional email
- > Implemented Supabase-backed authentication, persistence, and secure access patterns across booking journeys
- > Configured Resend for transactional emails (confirmations, updates) with reliable templating and delivery
- > Tuned search-to-checkout UX and API usage for responsive results pages and fewer abandoned sessions
- > Established a consistent API integration layer with retries, timeouts, and structured logging for Duffel and CarTrawler
- > Normalized itinerary, passenger, and rental-driver data across suppliers before persisting confirmed bookings
- > Shipped mobile-first, responsive UI with clear itinerary review, pricing breakdowns, and accessible form patterns
- > Applied environment-based configuration, least-privilege credentials, and strict separation of test vs production keys

CarHub (<https://carhub.pk>)

Feb 2026 - Present

Car Sale & Rental Marketplace

Lead Full Stack Developer · Spell Link Pvt Ltd

Laravel-based marketplace where registered users create accounts, list vehicles for sale or rent, and buyers or renters discover listings and complete bookings. Emphasis on trust, clear listing workflows, and a straightforward customer journey.

Laravel PHP MySQL Blade JavaScript REST APIs

- > Implemented account onboarding, profiles, and role-aware access for sellers and customers
- > Built listing management for sale and rental inventory with media, pricing, and availability
- > Developed booking and enquiry flows so customers can reserve or request vehicles from active listings
- > Shipped admin and moderation tools to keep listings quality high and disputes low
- > Delivered discovery with search, filters, and sorting so buyers can narrow by price, location, and vehicle type
- > Hardened forms, validation, and Laravel security defaults (CSRF, policies, guarded routes) across the marketplace
- > Designed MySQL schema and indexes for high-traffic marketplace queries (geo, price bands, make/model, availability)
- > Built seller dashboards for listing performance, enquiries, and booking funnel visibility
- > Implemented validated media uploads, organized storage, and thumbnail generation for multi-photo vehicle galleries
- > Added email notifications for new enquiries, booking status changes, and listing approvals or rejections

Estimation Company CRM (Not Public)

Feb 2026 - Present

CRM with Client Portal & Chat

Lead Full Stack Developer · Spell Link Pvt Ltd

End-to-end Laravel CRM tailored for an estimation business: leads, quotes, jobs, documents, and reporting, plus a dedicated client portal and real-time chat so staff and clients stay aligned without email overload.

Laravel PHP MySQL WebSockets / Realtime Blade JavaScript

- > Modeled CRM entities and permissions for estimators, managers, and client-facing users
- > Delivered client portal for estimates, approvals, file exchange, and status visibility
- > Integrated in-app chat for fast clarification between teams and clients on active jobs
- > Built dashboards and exports for pipeline visibility and operational reporting
- > Implemented lead-to-quote-to-job workflows with stage tracking, assignments, and audit-friendly history
- > Centralized documents and revision context so estimates, drawings, and approvals stay attached to the right job
- > Shipped quote versioning with readable change history so everyone aligns on scope, line items, and totals
- > Added tasks, due dates, and clear ownership handoffs between estimators and coordinators on active opportunities
- > Implemented role-scoped notifications for portal replies, approvals, and escalations so nothing sits unread in email
- > Used soft deletes, immutable activity timelines, and consistent audit fields for handovers and dispute review

KEY PROJECTS

Depilc ERP/CRM System (Not Public)

Sep 2025 - Jan 2026

Lead Full-Stack Developer & System Architect

Enterprise-grade ERP/CRM with 13+ modules including lead management, project tracking, real-time communication, and role-based permissions for complex business workflows.

Next.js

TypeScript

MongoDB

Supabase

Redux Toolkit

AWS S3

Socket.io

> Architected complete system with 13+ interconnected modules

> Implemented multi-tier authentication with 2FA for admin and employees

> Built dynamic role management system with hierarchical permissions

> Developed 9-stage workflow process from lead to project completion

> Integrated Supabase for real-time communication and notifications

> Implemented secure file storage with AWS S3 and document version control

> Designed client portal for project visibility and communication

E-Commerce Platform (MERN Stack) (<https://pg-shop.cognitivebeam.com/>)

Jul - Aug 2025

Full-Stack Developer

Full-featured e-commerce solution with product catalog, shopping cart, secure checkout, and admin dashboard for inventory management.

React

Node.js

Express.js

MongoDB

Squareup

Shippo

Redux

> Developed complete user authentication system with JWT

> Built responsive product listing with search and filtering

> Implemented shopping cart with session persistence

> Integrated Squareup payment gateway for secure transactions

> Created admin dashboard for product and order management

> Built order history and tracking system

Inventory Management System (Not Public)

Mar - Jul 2025

Full-Stack Developer

Comprehensive inventory tracking with supplier management, automated alerts, and role-based access control.

MERN

MySQL

Prisma ORM

Bootstrap

Socket.io

JWT

> Designed and implemented complete database schema

> Built inventory tracking system with real-time updates

> Developed automated low-stock alert system

> Implemented comprehensive reporting with export functionality

> Built role-based access control for different user levels

> Created audit logging for inventory transactions

Point of Sale (POS) System (Not Public)

2024

Full-Stack Developer

Professional POS for retail with fast checkout, barcode support, invoice generation, and sales analytics.

Core PHP

MySQL

JavaScript

Bootstrap

TCPDF

> Developed fast and responsive sales processing interface

> Implemented product management with product recipies

> Built automated invoice generation with PDF export

> Implemented sales analytics and reporting dashboard

ADDITIONAL PROJECTS

E-Commerce Mobile App (Not Public)

Jul - Sep 2024

Mobile Developer

Cross-platform shopping app with product catalog, cart, and secure payment processing.

React Native **Expo** **Redux**

- › Developed cross-platform app for iOS and Android
- › Implemented smooth navigation with React Navigation
- › Built product catalog with infinite scroll
- › Created shopping cart with persistent storage
- › Integrated secure payment processing
- › Implemented push notifications for order updates
- › Optimized performance for smooth user experience
- › Built user profile and order history features
- › Developed search and filtering functionality
- › Created wishlist and favorites feature

Inventory Mobile App (Not Public)

May - Aug 2025

Mobile Developer

Mobile inventory management with barcode scanning and offline-first architecture.

React Native **Expo** **Redux**

- › Developed cross-platform mobile app with React Native
- › Implemented barcode scanning with Expo Camera
- › Built offline-first architecture with SQLite
- › Created real-time stock tracking system
- › Developed supplier management module
- › Implemented automated low-stock alerts
- › Built comprehensive reporting with export functionality
- › Created data synchronization mechanism
- › Implemented user authentication and role-based access control
- › Built user profile and order history features

Real Estate Website (Not Public)

Sep - Dec 2024

Frontend Developer

Modern property showcase with advanced filtering, image galleries, Google Maps integration, and SEO optimization.

HTML5 **CSS3** **JavaScript** **Bootstrap** **Figma**

- › Designed and developed fully responsive layout
- › Implemented advanced property filtering system
- › Created interactive image galleries with lightbox
- › Integrated Google Maps for property locations
- › Built contact forms with validation
- › Optimized images and performance for fast loading
- › Implemented SEO best practices
- › Collaborated with designers using Figma

MORE PROJECTS

CE Prop Real Estate Website (<https://www.ceprop.co.za>)

2024

Frontend Developer & Backend Integration

Comprehensive real estate platform with property listings, agent management, and enquiry forms

Bootstrap **EJS** **JavaScript** **CSS3** **HTML5** **Font Awesome** **Node.js** **Express.js**

- › Developed complete frontend using Bootstrap from scratch
- › Implemented responsive navigation with dropdown menus
- › Created dynamic property grid pages with filtering
- › Built agent listing and profile pages
- › Integrated enquiry forms for property sales/rentals
- › Ensured cross-browser compatibility and mobile responsiveness

Pentz Properties Real Estate Website (<https://www.pentzproperties.com/>)

2023

Frontend Developer & Backend Integration

Professional real estate platform with property search, sold listings, and comprehensive tools

Bootstrap **EJS** **JavaScript** **CSS3** **HTML5** **Font Awesome** **Node.js** **Express.js**

- › Developed complete frontend using Bootstrap from scratch
- › Implemented property search with sale and rental categories
- › Created sold properties tracking page
- › Built tools section with calculators and property listing forms
- › Developed news section with email newsletter integration

To Be Real Estate Website (<https://www.toberealestate.com/>)

2023

Frontend Developer & Backend Integration

Advanced real estate platform with comprehensive property categories and interactive features

Bootstrap **EJS** **JavaScript** **CSS3** **HTML5** **Font Awesome** **Node.js** **Express.js**

- › Developed complete frontend using Bootstrap from scratch
- › Implemented complex multi-level navigation with sub-menus
- › Created property category pages (Buy, Sell, Rent, Commercial, Off-Plan)
- › Built interactive sub-menu with images and contact links
- › Developed team section with agent grid and studio information
- › Created responsive design with custom styling and Font Awesome icons

Buildwise Estimators Website (<https://buildwise-estimators.com/>)

2023

Frontend Developer

Professional construction estimating website with service listings, project portfolios, and contact forms

HTML5 **CSS3** **JavaScript** **GSAP** **Font Awesome** **Tawk.to**

- › Developed complete frontend using HTML5 and CSS3 from scratch
- › Integrating Tawk.to live chat functionality
- › Implemented responsive navigation with mobile hamburger menu
- › Developed about, testimonials, and footer sections
- › Implemented GSAP animations for smooth user experience
- › Ensured cross-browser compatibility and mobile responsiveness
